

Work on this track spreadsheet began with Mr. R. Scott Pell of Franklin Area Schools. His vision was to create a spreadsheet application to make the scoring process for the annual Franklin Relays track meet invitational more efficient and speedy.

Unfortunately, Mr. Pell passed away before he was able to complete this project.

I was asked by the Franklin High School track coach if I could take Mr. Pell's unfinished files and complete this project.

I took this project on and completed the spreadsheet application. Since that time, the invitational has grown to incorporate around 2 dozen male and female teams and hundreds of participants.

The spreadsheet application can now calculate scoring on the fly, and results for all 16 events are completed by the end of the day-long event. This allows coaches to take with them the results from the meet, and in addition allows the local newspaper to obtain the results for the paper that same evening.

Screen shots of the spreadsheet's capabilities follow.
